

ANURAG ENGINEERING COLLEGE WEBSITE UI REDESIGN

Project Overview

Project Title

Anurag Engineering College Website UI Redesign

Objective

The objective of this project was to redesign the existing Anurag Engineering College website to improve usability, accessibility, navigation clarity, visual hierarchy, and mobile responsiveness. The redesign aims to create a modern, student-focused digital experience while maintaining the institution's professional identity.

Expected Outcome

- Improve navigation and information discoverability
 - Enhance visual hierarchy and user engagement
 - Increase accessibility compliance
 - Create a responsive user experience across devices
 - Provide a more intuitive student portal experience
-

Heuristic Evaluation

The existing website was evaluated using Nielsen's 10 Usability Heuristics.

Evaluation Summary

A total of 15 usability issues were identified across six major categories:

1. Navigation

Issues Identified:

- Excessive number of navigation items
- Information architecture complexity
- Lack of active-state indicators
- Difficult content discovery

Severity: Major

Recommendations:

- Reduce top-level navigation items
- Improve menu organization
- Introduce active navigation states
- Improve information grouping

2. Privacy

Issues Identified:

- Student login not prominently visible
- Limited privacy-related information

Severity: Major

Recommendations:

- Introduce dedicated student login access
- Improve visibility of secure student services

3. Visual Hierarchy

Issues Identified:

- Multiple competing focal points
- Weak call-to-action emphasis
- Content prioritization issues

Severity: Major

Recommendations:

- Improve hero section hierarchy
- Introduce stronger visual contrast
- Prioritize key actions

4. Consistency

Issues Identified:

- Inconsistent button styles
- Lack of unified design system

Severity: Moderate

Recommendations:

- Establish component library
- Standardize visual language

5. Accessibility

Issues Identified:

- Contrast improvement opportunities
- Missing accessibility enhancements

Severity: Moderate

Recommendations:

- Improve WCAG compliance
- Enhance keyboard accessibility
- Improve focus indicators

6. Error Prevention

Issues Identified:

- Limited search discoverability
- Lack of recovery pathways

Severity: Minor

Recommendations:

- Improve search visibility
- Add navigation support mechanisms

Mood Board

Design Direction

The redesign follows a Swiss-Minimalist design philosophy emphasizing clarity, structure, readability, and functionality.

Design Principles

- Clean layouts
- Strong grid systems
- Generous whitespace
- Content-first approach
- Accessibility-focused design

Typography System

Fraunces

Used for display headings and major visual statements.

Inter

Used for interface elements and body content.

DM Mono

Used for labels, statistics, and data presentation.

Color Palette

Primary Navy: #0F1C2E

Primary Blue: #1D4ED8

Accent Amber: #F59E0B

Background: #F8FAFC

Surface White: #FFFFFF

Accessibility Commitment

All color combinations were selected to satisfy WCAG accessibility guidelines while maintaining strong visual hierarchy.

Style Guide

Typography Scale

H1 – 64px H2 – 48px H3 – 32px Body – 16px Caption – 14px

Button System

Primary Button

- Blue background
- White text
- Rounded corners

Secondary Button

- White background
- Blue border
- Blue text

States

- Default
- Hover

- Focus
- Disabled

Card Components

Statistics Card

Used for placement and academic statistics.

Faculty Card

Used for faculty directory presentation.

Event Card

Used for announcements and campus activities.

Information Card

Used for academic and administrative information.

High-Fidelity Mock-ups

Homepage Redesign

Goals

- Simplify navigation
- Improve visual hierarchy
- Highlight student-focused actions
- Improve content discoverability

Key Features

- Simplified navigation menu
- Dedicated student login
- Enhanced hero section
- Placement statistics
- Top achievers section
- Faculty highlights
- Improved call-to-action buttons

[Insert Redesigned Homepage Screenshot]

Student Login Page

Goals

- Improve visibility of student services
- Provide secure access point
- Reduce friction in result access

Features

- Hall Ticket Number field
- Password field
- Forgot Password option
- Secure login experience

[Insert Login Page Screenshot]

Results Dashboard

Goals

- Provide quick academic insights
- Improve information visibility

Features

- Student profile summary
- CGPA display
- GPA display
- Subject-wise results
- Download marksheet functionality

[Insert Results Dashboard Screenshot]

Faculty Directory

Goals

- Improve faculty discoverability
- Simplify department navigation

Features

- Search functionality
- Department filters
- Faculty profile cards

- Contact information

[Insert Faculty Directory Screenshot]

Mobile Responsive Design

Goals

- Improve mobile usability
- Ensure responsive layouts

Features

- Hamburger navigation
- Responsive cards
- Mobile-first spacing
- Improved touch targets

[Insert Mobile Design Screenshot]

Before vs After Comparison

Existing Website

Complex Navigation

Limited Student Focus

Weak Visual Hierarchy

Hidden Student Services

Inconsistent Components

Limited Mobile Optimization

Redesigned Website

Simplified Navigation

Student-Centric Design

Strong Visual Hierarchy

Dedicated Student Login

Unified Design System

Responsive Experience

Accessibility Improvements

The redesign incorporates accessibility improvements aligned with WCAG guidelines.

Improvements Implemented

- Improved contrast ratios
- Consistent focus states
- Improved navigation structure
- Better content hierarchy
- Responsive design support

- Accessibility-focused component design
-

Outcome

The redesign successfully addresses the primary usability issues identified during the heuristic evaluation. Navigation complexity was reduced, visual hierarchy was strengthened, student-focused services were made more accessible, and a consistent design system was introduced.

The final solution delivers a modern, responsive, and user-friendly experience that better serves students, faculty members, and prospective applicants while maintaining the institution's professional identity.

Tools Used

- Figma
- Heuristic Evaluation
- Responsive Design Principles
- UI Design Systems
- Accessibility Guidelines (WCAG)
